ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: A METHOD OF MODULATING ENDOTHELIAL CELL ACTIVITY

(57) Abstract: The present invention relates generally to a method of modulating endothelial cell activity and to agents useful for same. More particularly, the present invention relates to a method of modulating intercellular vascular endothelial permeability by modulating an intracellular protein kinase C-dependent signalling mechanism. The method for the present invention is useful, *inter alia*, in the treatment and/or prophylaxis of a condition characterised by aberrant, unwanted or otherwise inappropriate endothelial cell activity, in particular, conditions characterised by a loss of vascular integrity.
